

# Two-way Integration with IDEXX Analysers

## Without integration

1

Write an order

2

Pass the order to a technician

3

Manually enter patient details into the IVLS

4

Run the tests.

5

Enter results manually into PMS

6

Veterinarian is notified manually of results

## Animana 2-way integration

### Easy as 1-2-3

1

From a patient file, **select analysers and tests** then **send the request** straight to your IDEXX analysers.

2

Request **arrives at the IVLS**, prepopulates patient details.

**Run the tests**

3

Once the test is run, the **results arrive in Animana**, and appear **in the patient history**, along with the PDF report.

# IDEXX Animana

Now with a two-way integration with your IDEXX analysers.

## What is two-way integration?

When you implement two-way diagnostic integration, diagnostic order and result information flow seamlessly back and forth between your practice management software (where orders are placed and results are received), and your in-house analysers.

Not all integrations are the same. True two-way integration has the following capabilities that make your practice's work flow more efficient:

1. Order the diagnostic tests for in-house analysers from within the record while eliminating the need to reenter any patient or client data anytime during the process.
2. Automatically receive and post the results to the patient record.

## Why do you need two-way integration?

The IDEXX Animana two-way integration brings you the following benefits:

- Increases staff efficiency by automating and eliminating manual steps in the process.
- Virtually eliminates errors associated with manual entry.
- Improves clinical decisions through complete patient reports and direct access to historical views and trending within IDEXX VetConnect® PLUS.

## Why is two-way integration better with IDEXX Animana?

As the industry's leading diagnostic experts, we will make sure Animana brings you features that we have found eliminate manual steps and improves workflow

- You can order directly from within the patient record in just three easy steps. The Animana workflow will save you time every visit, overall saving you valuable time each week.
- Diagnostic results are available directly within the patient record saving you time and ease in finding the results information.
- You get access to patient results in IDEXX VetConnect PLUS where you will find full historical views of your patient's results.
- Setup is very easy and it is free of charge.

## Are you ready to use Animana's IDEXX Analysers integration?

Animana's two-way integration with the IDEXX in-clinic analysers requires

- An IDEXX VetLab® Station with current software version
- A Microsoft Windows PC (Windows 7 or newer)
- The activation of the integration module in Animana.
